

## Summer Camp Protocols for CoViD-19

There are lots of questions related to measures being taken to ensure everyone's safety while at Summer camp. We want to outline all the protocols we plan to take, but please be advised that in this ever-changing environment some of these measures may be adjusted depending on the current circumstances. Our goal is to have as normal of a Summer Camp experience as possible! Therefore, we are planning to employ the cohort/pod model for camp with a slightly-modified approach. We will ask that units stay together, and distanced from other units, for larger gatherings such as daily opening and closing assemblies, dining outside the commissary, and evening campfire programs.

### Pre-Camp Procedures

1. Each unit should have completed the BSA SAFE RESTART checklist.
2. All Campers and leaders must have proof either of CoViD Vaccination (copy ok) or a negative CoViD test (non-home test) taken within 72 hours of arrival at camp. All Campers and their leaders are highly encouraged to self-quarantine for the 72 hours prior to arrival at camp.
  - a. To be considered vaccinated, two weeks should have passed following the complete vaccination cycle (either J&J's single dose or Pfizer and Moderna two dose vaccines).
  - b. The CDC does not recommend getting tested again in the three months after a positive viral test if the person does not have symptoms of CoViD-19. Campers and staff who have had a positive viral test in the 3 months prior to starting camp and have met the criteria to end isolation should have a letter from their healthcare provider documenting the positive test date and stating the individual is cleared to end isolation.
3. Each Camper, leader, and driver is required to complete the attached Marin Council Participant Health Screening form prior to leaving for camp.
4. Every Camper, leader, and their drivers must have a temperature below 100°F immediately prior to departure for camp.
5. During our busiest weeks, your unit may be asked to stage their vehicles off-site to allow proper physical-distancing for an assigned arrival time.

### Procedures at Camp

1. Upon arrival at camp, vehicle occupants are to show proof of either a CoViD Vaccination (copy ok) or a negative CoViD test taken within 72 hours of arrival at camp or a letter from their healthcare provider documenting the positive test date and stating the individual is cleared to end isolation before the vehicle may be unloaded. Vehicles that do not present credentials may not be permitted to unload and occupants may be asked to leave camp property. (Parents may drop off Scouts, but they are not permitted to leave the central area of the camp)

- unless they have proof of vaccine or negative test.)
2. While at camp, campers and leaders are to follow Marin Sierra face covering and physical distancing guidelines as directed by the Nevada County Environmental Health Department and U.S. Center for Disease Control. Sufficient face coverings for a week at camp in sometimes hot and dusty conditions should be sent with all Campers and leaders. (Face covering guidelines are attached. These guidelines are subject to change based on health department guidance.)
  3. In each program area, campers should maintain physical distancing from members outside their own troop. High contact areas will be routinely sanitized several times a day. Between program session or when traveling to another area of camp, all campers should wash their hands; there are numerous handwash stations throughout camp and extra hand-sanitizing stations will be positioned throughout the camp.
  4. While at camp, all campers will sleep no more than two individuals to a tent. If individuals are sharing a tent, they will need to sleep head-to-foot and maintain a maximum amount of ventilation in the tent and keep the flaps open if possible.
  5. Units will conduct a "Healthy Camper Inventory" on a daily basis which will be reported to camp leadership. Should any camper or leader present any symptoms, unit leadership is to immediately notify camp leadership.
  6. All Youth Protection guidelines must continue to be followed:
    - a. Scouts BSA Youth may NOT share a tent with an adult, even if related.
    - b. All youth must be within two years of age.

### Post-Camp Procedures

1. As with Arrivals, all Drivers coming to pick up Units should meet the criteria of proof either of CoViD Vaccination (copy ok) or a negative CoViD test taken within 72 hours of arrival at camp or a letter from their healthcare provider documenting the positive test date and stating the individual is cleared to end isolation. Drivers are to stay with their vehicles and not go to the Campsites; units should arrange for someone to meet the driver in the parking lot.
2. On the Tuesday after Camp, each unit will receive an email asking for a report back related to CoVid status of members who attended camp. That response will need to be completed within 24 hours of receipt.
3. Should any Camper (Youth or Adult) develop CoViD within 10 days following their camp week, we would ask that you inform us as soon as possible after the diagnosis to allow any contact tracing and notification of other units.
